Address
Uzbekistan, Tashkent

Education

2024-2025
Najot Ta'lim Learning Center
Bootcamp Full Stack (Node.Js+React)

Hard Skills

- JavaScript
- NodeJs
- Express
- TypeScript
- NestJs
- Sequelize
- Prisma
- Mongoose
- MySQL
- PostgreSQL
- MongoDB
- Docker

Language

English-B2

Russian-B2

About Me

Hi, I'm Abubakr. I'm a NodeJs Backend Developer passionate about building robust systems. A quick learner who values clean code and reliability. Committed to continuous growth through impactful projects.

Soft Skills

- Writing clean and understandable code.
- Working with documentation.
- Meeting deadlines
- Collarboration effectively with a team
- Asking questions and giving constructive feedback

Job Experience   2024-2025

1. EducationalCenterSearch:
Worked on a platform that helps users find and compare educational centers by location, courses, and reviews. Contributed to both backend and frontend for a smooth, user-friendly experience.

2. E-commerce Project:
Participated in developing an online marketplace for buying and selling products or services. Focused on core features like user authentication, product listings, and search functionality.

3. Restaurant Management System:
Built the backend for a system to digitalize restaurant operations. Developed features such as user login, menu management, order handling, and table reservations.

4. Arbait Clone – Service Marketplace:
Developed the backend for a service platform inspired by "Arbait", connecting users with service providers (e.g., gardeners, plumbers). Implemented authentication, service listings, booking, reviews, and role-based access control.
